Education

B.E. Information Science & Engineering

Siddaganga Institute of Technology, Tumkur

September 2024 – Present

CGPA: 8.51 / 10

Intermediate-PCM (12th)

City Public School, Gaya

March 2024

Percentage: 86.5%

Secondary Education (10th)

Creane Memorial High School, Gaya

July 2022

Percentage: 94.3%

Skills

Programming & Data: C++, Python, SQL, C

Web Development: JavaScript, HTML, CSS, NodeJS, Express, React.js, Django, Tailwind CSS

Databases: MongoDB, MySQL, PostgreSQL

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Applied ML: Machine Learning, NLP, Sentiment Analysis, REST APIs

Tools: Git, GitHub, Power BI/Tableau, Postman

Experience

Member — AI Brewery, SIT

AI Brewery, SIT

October 2025 – Present

Student Organization

- Collaborate with a student-led AI research and engineering group to translate academic ML/GenAI theory into deployable, real-world solutions.
- Work hands-on with Generative AI and Agentic AI frameworks to design, prototype, and build applied machine learning solutions.

Member — Quizzing Inc, SIT

Quizzing Inc, SIT

November 2024 – Present

Student Organization

- Compete in technical and general-knowledge quizzing events, sharpening rapid analytical reasoning and structured decision-making under time constraints.

Projects

Memory Companion AI — Virtual Saathi | Python, NLP, Sentiment Analysis, Contextual Memory, Chatbots 2026

- Built an NLP-driven conversational AI that performs sentiment analysis on user input to interpret emotional context and generate empathetic, context-aware responses.
- Designed a contextual memory mechanism allowing the chatbot to recall prior conversations, enabling continuity and personalization across multiple sessions.

Homico | JavaScript, React.js, Django, Django REST Framework, MySQL/PostgreSQL 2026

- Developed a full-stack home-services platform supporting bookings, material orders, and end-to-end construction project management.
- Built a Django REST API backend with role-based access control and a React.js frontend delivering distinct dashboards for users, vendors, and admins.
- Integrated the Google Maps API for location-based vendor discovery and the OpenAI API to power an in-app AI assistant for customer support.

Awards & Certifications

- **CodeChef – Problem Solving:** Solved 600+ problems | Gold Badge
- **IBM SkillsBuild Certificate – Getting Started with Artificial Intelligence (2025):** Completed foundational training in AI concepts and practical applications.
- **CodeChef Certificate – Logic Building and Problem Solving using C++ (2025):** Completed structured training in problem solving and logical thinking using C++.
